k cover: Often something of a cliffhanger, the story of the Canadian Wildlife Service is a chronicle of a small group of men and women whose passion for wildlife has often led them to test the outer limits of Canada. The image of Don Reid, suspended by a strand of rope while banding Thick-billed Murres on Coburg Island, Northwest Territories, is an apt metaphor for CWS itself: focused, caring, and at risk in an era of profound jurisdictional and administrative change (Photo credit: P. Mineau).
